

Register the ORA ITSM mail app

So ORA ITSM can send notifications from `ITSM-Notification@blackstar-iraq.com` (and no other mailbox).

1

New registration

entra.microsoft.com → App registrations → New registration

1. Name: `ORA ITSM Mail`
2. **Single tenant**
3. No redirect URI → **Register**

Do not add API permissions.

Step 4 gives a permission limited to one mailbox.

Name

ORA ITSM Mail

- ☒ Accounts in this organizational directory only

Register

2

Client secret

Certificates & secrets → New client secret (24 months)

Copy the **Value** right away (shown once), not the Secret ID.

Expires	Value	Secret ID
10/2028	Xq8~a1B.....	4f1c...

3

Copy the IDs

Two pages

- **App registrations** → Overview: **Client ID** and **Tenant ID**
- **Enterprise applications** → ORA ITSM Mail: **Object ID**

Application (client) ID	a1b2c3d4-...
Directory (tenant) ID	9f8e7d6c-...
Object ID (Enterprise app)	5e6f7a8b-...

Allow only this mailbox

Exchange Online PowerShell

PowerShell

```
# 1. Connect with an Exchange administrator account
Connect-ExchangeOnline

# 2. Register the app in Exchange
New-ServicePrincipal -AppId <client-id> -ObjectId <object-id> -DisplayName "ORA ITSM Mail"

# 3. A scope that contains only the notification mailbox
New-ManagementScope -Name "ORA ITSM sender" -RecipientRestrictionFilter "PrimarySmtpAddress -eq 'ITSM-Notification@blackstar-iraq.com'"

# 4. Allow the app to send as the mailboxes in that scope
New-ManagementRoleAssignment -App <client-id> -Role "Application Mail.Send" -CustomResourceScope "ORA ITSM sender"

# 5. Check: InScope must be True
Test-ServicePrincipalAuthorization -Identity <client-id> -Resource ITSM-Notification@blackstar-iraq.com
```

Replace `<client-id>` and `<object-id>` with the values from step 3. Last line must show `InScope : True` (can take up to 2 h).

Send back

Tenant ID + Client ID

Email OK

Secret Value + expiry date

Teams / phone, not email
